

Frontier UNCHANGED — and UNRESOLVED: both candidate walls fall inside the grid's 125M→250M hole  
observationally equivalent here; a single run at 1.2B/8 (150M rows/GPU) would separate them  
(at 125M, 24 of 27 configs FIT — the 3 that don't are bs512, bound by activation memory, not the shard)
