

§8a v26.05 → v26.06 — per-step GPU-time in absolute ms, run order (matched 1B/4096/lognormal, GB300 8-GPU, shared y-axis)

every v26.06 bar is shorter (−17.6% median step, −18.9% total); the shrink is in the NCCL(exposed) + compute bands — the grey IDLE band is ~unchanged step-for-step

IDLE NCCL(exp) HSTU GEMM ELEM EMB OTH
