

HSTU GPU-time sunburst — jagged runs, exposed accounting, fastest step (upstream PERF_ANALYSIS §2.2 method)
inner ring = grouping · outer ring = leaves · % of the step

Our H100 · step 153 · D256 (jagged)

Our GB300 · step 155 · D128 (jagged)

HSTU = hstu fwd/bwd PROJ = gemm / projection ELEM = elementwise N-E = nccl (exposed) IDLE = GPU idle OVL = overlapped
UVQK = gemm / uvqk G-O = gemm / others EMB = embedding op N-O = nccl (overlap) OTH = others
